### **DETAILED ACTION**

1. The amendment and drawings filed 1/29/07 have been entered.

### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Eric S. Hyman on 3/1/07.

The application has been amended as follows:

In claim 18, line 7 (the last line), after "sample" insert -- and outputting the results to a reading device--

### ***Allowable Subject Matter***

3. Claims 10, 12-16, and 18-21 are allowed.
4. The following is an examiner's statement of reasons for allowance: Prior art fails to disclose an X-ray apparatus for high-resolution X-ray diffraction of thin layers of single crystal, comprising: a sample stage holding a sample having a substantially single crystal thin layer at a front face; a means for generating a collimated beam of X-rays at a predetermined target location on the sample stage at an angle of between 0 degrees and 60 degrees to the normal direction; and an X-ray detector arranged laterally of the sample stage for detecting X-rays scattered by the sample to a predetermined range being from 80 degrees to 90 degrees to the normal direction,

Art Unit: 2882

wherein the means for generating a collimated beam of X-rays comprises an X-ray source and a slit between the X-ray source and the sample stage, wherein the means for generating a collimated beam does not include a monochromator, as claimed in claim 10. Claims 12-16 are allowed due to their dependency on claim 10.

Prior art fails to disclose a method of high-resolution X-ray diffraction, comprising directing an incident collimated beam of x-rays created without a monochromator onto the sample at an angle of 0 degrees to 60 degrees to the normal to the plane, and measuring with the X-ray detector the X-rays diffracted by the sample to a range of angles in the range 80 degrees to 90 degrees to the normal to the plane, as claimed in claim 18. Claims 19-21 are allowable due to their dependency on claim 18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
